DETAILED ACTION

Allowable Subject Matter

1. **Claims 8-17,19 & 20 are allowed.**
2. The following is an examiner's statement of reasons for allowance: the allowability resides in the overall structure of the device as recited by independent claims 8,11, & 14, and at least in part, because **Claim 8** recites: "wherein the second portion pivots relative to the first portion when the first and second portions are released and in the extended position," **Claim 11** recites: "pivoting the second portion relative to the first portion when the multiple-connector tray in the extended position to render the plural connectors accessible," and **Claim 14** recites: "when the multiple-connector apparatus has a first portion and a second portion, the second portion pivots relative to the housing upon being extended from the housing." The aforementioned limitations in combination with all remaining limitations of claims 8,11 & 14 are believed to render the claims 8,11 & 14 and all claims dependent thereupon, patentable over the art of record.

US 6217351 B1 to Fung et al. is considered a close reference to the instant application. Fung et al. disclosed a multiple-connector apparatus (100), connectors (170,172) and trays (174,176), but is silent as to pivoting a second portion relative to first portion, when the trays (174 & 176) are in an extended position.

US 6217350 B1 to Johnson et al. is considered a close reference to the instant application. Johnson et al. teaches a means (100,90) for holding connectors in a retracted position, but is silent as to pivoting a second portion relative to a first portion, in an extended position.

The aforementioned references, either alone or in-combination, are not believed to render the present invention, unpatentable as claimed. Thus, **claims 8-17,19 & 20 are allowed.**
